

***** Introducing the new ICS *****

**PILOT'S OPERATING HANDBOOK
AND FAA APPROVED
AIRPLANE FLIGHT MANUAL**

"Formerly Published And Produced by the late Douglas L. Killough"

Piper Aircraft ceased production of the Comanche and Twin Comanche in 1972, several years before the General Aviation Manufacturers Association (GAMA) established specifications for the contemporary Pilot's Operating Handbook (POH). As a result, the Owner's Handbook published by Piper is incomplete by modern standards. Now available **EXCLUSIVELY** from the **INTERNATIONAL COMANCHE SOCIETY, INC.**, through it's licensed agents, is the upgraded Pilot's Operating Handbook and FAA approved GAMA format Airplane Flight Manual.

Discounted to current ICS members at \$75.00 each plus shipping (must ask for ICS member discount and provide ICS membership number when placing order) Available **only through Webco Aircraft @ 316-283-7929 www.webcoaircraft.com *Avail Bound or Unbound/Un-punched**

There are **SIXTEEN** different GAMA format manuals available for the Piper Single and Twin Comanche. Please order your manual by "Manual Number 1-16" from the attached chart.

***(Specify "Bound" or "Unbound/Un-punched")**

Nacelle Tanks

FEATURING:

Easy Installation, approximately 35-40 hours.
Economically priced at \$3500.00 for Complete kit & STC.
10.2 gallons per side, all useable.
All enclosed, no external plumbing except vent,
drain & overflow tubing ends.

Mounts in center nacelle bay on each side.

VIEW A-A
LH side shown with center nacelle skin removed.

Operation Procedure:

1. Burn aux tanks to approximately 1/4 full.
2. Begin transfer by turning on transfer pump switch.
Fuel is transferred into same side aux tank.
Transfer must be in level flight.
3. Transfer will take approximately 75 minutes with completion noted by time & warning light. Turn nacelle transfer switch off.

Note: Each side controlled by separate switch and lights.

FULLY STC'D & PMA'D!
YOUR MECHANIC CAN INSTALL.
